

PALLETPAL®

The World's Best Automatic Pallet Leveler Now, Even Better!

PALLETPAL 360™

Since 1988, PalletPal® Level Loaders from Southworth have set standards in quality, durability and performance for manual palletizers, while remaining the most economical choice.

We've taken our original fully automatic, spring actuated, no power required design and made it even better. The new **PalletPal 360™** offers workers complete 360° access to loads. All of its components are contained within the diameter of the turntable ring. There are no protrusions, projections or obstructions, so reach-over zones are eliminated (see illustration at right).

Features

- Heavy-duty springs automatically adjust as boxes are added or removed from pallets, keeping loads at a comfortable working height.
- Low-friction turntable spins easily for nearside loading and unloading.
- Extremely stable base - no lagging required.
- Integral fork pockets for easy relocation.
- Multiple spring configurations for loads from 400 lbs. to 4,500 lbs.
- Spring changes (if necessary) are fast and easy - no tools required.

Capacity Range	Compressed Height	Extended Height	Turntable Diameter	Base Dimension*	Shipping Weight
400-4,500 lbs.	9 1/2"	28"	43 5/8"	36" x 36"	380 lbs.

*includes fork pockets

PalletPal 360™ Full Access - 360°

When viewed from the top, the ergonomic advantage of the **PalletPal 360™** is obvious. The green area shows where workers can stand and have unencumbered access to loads. The PalletPal 360 offers a full 360° of worker access.

Competitive Models Limited Access

Reach-Over Zone

Reach-Over Zone

Competitive units have obstructions that significantly reduce worker access to loads.
