

VDA easyZIP

Vertical black-out systems

Der SonnenLichtManager

The vertical black-out blind from WAREMA is an internal sun shading system in front of the window which, when lowered, prevents light from entering and reliably darkens the room. Equip rooms with special requirements in a functionally reliable way according to your needs.

*depending on type

The benefits for you

- Optimally dim out rooms: reliably control the incidence of light – spontaneously or via a control.
- Elegant and durable: the easyZIP variant is particularly stable, highly functional and can be quickly and securely mounted with a clip profile.
- Sturdy: flame retardant materials or non-flammable fabric facilitate fire protection (DIN 4102-1).
- Quick and secure assembly with clip profile
