GREENFIELDS MX ELITE

USED AT TOP CLUBS WORLDWIDE, OUR PREMIUM 3G WOVEN PRODUCT OFFERS HIGH SPEED PROFESSIONAL PLAY

Key benefits:

- Woven technology ensures maximum yarn bind
- Fibres stand straighter and more resilient
- Equal yarn spacing ensures natural ball roll
- Natural look due to the mix of three fibres
- 100% recyclable into high-end applications

GreenFields MX Elite is a high-tech woven system offering the very best performance characteristics for both amateur and professional players. This unique woven product has the highest number of fibres in a bundle with a mixture of three shapes and colours. The perfect fibre combination results in an optimum playing surface with a natural look as well as ultimate resilience.

The patented woven technology results in an extremely high yarn bind, stronger than traditional tufted products. This forces the fibres to stand even straighter and more closely resemble natural grass. Even spacing between the bundles in both the length and width ensures equal ball roll in every direction and less compaction of infill. The voluminous bundles of fibres close the carpet at the top reducing infill splash and migration. This results in an easier to maintain product with longer consistent performance. At its end of life, the product is 100% recyclable into high-end applications.

The MX Elite has been certified in many systems for different applications to match local needs. It is the best product in terms of durable performance and high-speed professional play.

**A PERFECT PITCH
FOR EVERY PLAYER**

YOUR PERFORMANCE

This GreenFields performance chart gives a first indication of the relative performance compared to our other products in the same category. GreenFields offers a perfect pitch for every player, and can provide a product that best suits your needs. For further advice, please consult your GreenFields sales representative.

BALL SURFACE INTERACTION

Covers the relative performance for vertical and angled ball rebound, ball roll and shock absorption.

PLAYER SURFACE INTERACTION

Reflects the relative score on optimal grip, skin comfort, hardness and surface impact.

SUSTAINABILITY

Covers infill sustainability, potential infill migration, material footprint and recyclability.

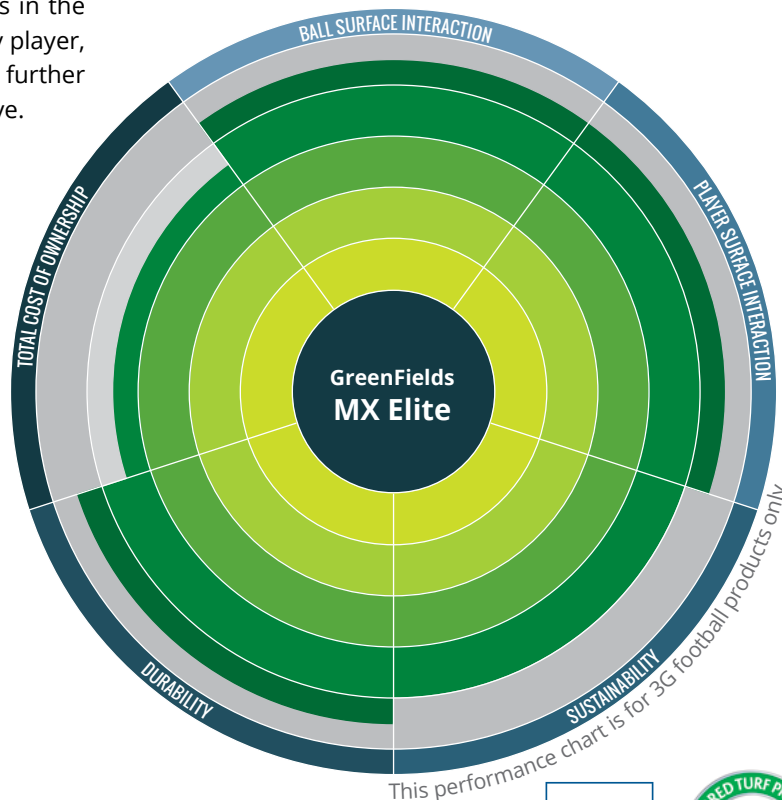

DURABILITY

Reflects the relative durability of the carpet in terms of fibre wear and strength, color fastness and yarn bind.

TOTAL COST OF OWNERSHIP

Reflects the relative costs of the carpet, system components, maintenance and end of life.
