

# SPEED-LOCK

## HANDBALL S20 - BUNDESLIGA COMPETITION

Speed-Lock Handball S20 was installed over the ice arena in Bietigheim-Bissingen in just 2.30 hours. In half a day the Egetrans Arena is transformed from an ice arena into a first class handball venue hosting 4000 fans. All game lines are pre-painted and handball goals are bolted onto the Speed-Lock panels within in a few minutes. Every month the Speed-Lock S20 handball floor is dismantled and or reinstalled for Bundesliga matches.

### 1. One.

The Speed-Lock M1 patented® aluminium interlocking system between the modules guarantees a stable and durable connection and perfect evenness.

### 2. Two..

The handball goals are bolted on the Speed-Lock panels for a perfect fitting and adjustment of the court.

### 3. Three...

The surrounding wedge-shaped border is permanently joined to the modules, and therefore does not require additional fitting.
