# VT-MCH Ceiling System

Multi Cushion Hanger

## Description

The VT-MCH Multi Cushion Hanger is designed for both top or back mounting. It could be used together with Vibratec click-on hangers and profiles for ceiling suspension, or as it is for hanging equipment such as speakers, pipes or ventilation.

For beam structures, back mounting of the hangers could reduce the total height of the system.

When a longer distance between ceiling and hanger is needed threaded rods could be used instead of bolts.

Elastically suspended ceilings must also be de-coupled from surrounding walls by using for instance self adhesive elastic strip VT-STRIP.

Screws, threaded bars, click-ons and ceiling profiles are not a part of the product and need to be ordered separately.
